ATTACHMENT

Comptroller Tasking

"Provide a report on actions taken or planned to provide network interoperability between the CIA, DoD and NSA communications systems in light of the changes underway currently in each of these communications systems.

(DCI CIAP Guidance, ADP-Telecommunications Guidance Item 4)

Due to O/Comptroller 15 August 1983

OC Response

Today, interoperability of CIA, DoD and NSA communications networks exists at a message level. The CIA message network interfaces with AUTODIN, with NSA, and with DoD message switches. Messages can be prepared and routed throughout the world using whatever resources are available.
